Dear Hiring Manager,

I am writing to apply for the Frontend Developer position. With five years of experience in frontend development at Ecoinsoft Solution, I have developed strong expertise in building scalable, high-performance web applications using Angular and TypeScript.

In my previous role, I have worked on large-scale enterprise systems, implementing responsive user interfaces and integrating APIs to ensure seamless frontend-backend communication. I also collaborated closely with backend developers and designers to deliver reliable, user-friendly solutions. Additionally, I was responsible for reviewing junior developers' code, managing branch merges, and supporting deployments to test, stage, and production environments to maintain code quality and system stability.

I am committed to continuous improvement, clean architecture, and delivering solutions that enhance system performance and user experience. I am confident that my technical skills, teamwork, and dedication would allow me to contribute positively to your organization.

Thank you for considering my application. I look forward to the opportunity to further discuss how I can support your team.

Sincerely,
Se Has

PROFESSIONAL SUMMARY

I'm a results-driven Frontend Developer with five years of experience building scalable, high-performance enterprise web applications using Angular and TypeScript. Skilled in system optimization, modern architecture, and delivering efficient, user-focused solutions.

WORK EXPERIENCE

Web Frontend Developer

(Ecoinsoft Solution | 01 Febuary 2021 – Present)

- Improved application load time by optimizing Angular change detection, implementing lazy-loaded modules, and reducing unnecessary API calls
- Built and maintained complex enterprise dashboards with real-time data visualization and role-based access control
- Refactored legacy frontend code into reusable Angular components and shared services
- Integrate with backend APIs and handle all response states
- Managed multiple enterprise modules including Policy, Endorsement, Quotation, Renewal, Risk Management, Claims, Finance, and Underwriting
- Implemented WebSocket and Socket.IO for low-latency, real-time data exchange
- Reviewed junior developers' code, managed branch merges, and deployed applications to test, stage, and production environment.
- Fixed bugs and refactored code to improve performance, readability, and maintainability.
- Provided user support and guidance on system usage

SKILLS AND KNOWLEDGE

- **Frontend Web Development:** HTML, CSS, JavaScript, and TypeScript, Angular, React, Vue, Bootstrap, TailwindCSS
- **Backend Web Development(foundation):** Node.js, Express.js, NestJS
- **Database(foundation):** MySQL, PostgreSQL, MongoDB
- **Real-time Technology:** WebSocket and Socket.IO
- **Mapping & Location:** Angular Google Maps, and Google Maps JavaScript API
- **Version Control & Collaboration:** Git, GitLab, and GitHub
- **UI/UX Design Tools:** Photoshop, Figma
- **Teamwork & Communication:** Experienced in collaborating effectively with backend developers and UI/UX designers to deliver high-quality applications.

PROJECTS

Infinity Insurance System

Enterprise-level insurance management system handling complex workflows including policy management, endorsements, quotations, claims, and underwriting modules.

Vessel Monitoring System

Satellite-based monitoring system for managing and tracking fishing vessel positions in real-time across web, tablet, and mobile platforms.

HR Management System

Centralized HR system for managing employee information, payroll, attendance, performance reviews, and organizational hierarchy.

Linkup

API platform for building, testing, and managing RESTful APIs with comprehensive documentation and integration capabilities.
